DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 24, 2009 has been entered.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on April 24, 2009 was filed after the mailing date of the Notice of Allowance on January 1, 2009. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Allowable Subject Matter

3. Claims 1, 2, 5-8, 11-19, and 21-71 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or make obvious the steps of or means for **"comparing the detected average throughput against a threshold throughput, wherein the threshold throughput is based on a maximum supported average data rate"**, when such comparing is considered within the specific structure of the method recited in claims 1 and 40 or the device recited in claims 27, 28, 34, 45, 50, and 55. The prior art of record fails to teach or make obvious the steps of or means for

"averaging a value indicative of a throughput for the current transmission with values indicative of throughputs for one or more prior transmissions in one or more prior transmissions intervals, wherein the averaging is achieved with a sliding window averaging", when such averaging is considered within the specific structure of the method recited in claim 7 or the device recited in claims 23, 56, 60, and 68. The prior art of record fails to teach or make obvious the steps of or means for **"the message is covered by a null cover that indicates that data transmission is not requested by the receiving device"**, when such message is considered within the specific structure of the method recited in claim 11 or the device recited in claims 24, 61, 64, and 65. The prior art of record fails to teach or make obvious the steps of or means for **"a controller coupled to the detector and operative to receive the status signal and generate a message requesting the transmission to stop the data transmission if the detected average throughput exceeds the threshold throughput"**, when such controller is considered within the specific structure of the device recited in claim 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
